"In the Same Place: Geographical Locality as Contribution to Christian Unity in Prayer"

"In the same place" is a recurring phrase in the New Testament which highlights the reality that being together is a fundamental way of being Church, the body of Christ. Regarding ecumenical prayer between Christians from different prayer practices, what does a geographical unity mean, especially in this 500th anniversary of the reformations within Western Christianity? Being in this place, and praying together as Christians offers us another way to understand the prayer of Jesus that we all be one.
